

U.S. Department of Commerce
BUREAU OF THE CENSUS

Manufacturers' Shipments, Inventories, and Orders

JANUARY 1983

M3-1(83)-1

FOR WIRE TRANSMISSION 2:30 P.M. E.S.T. THURSDAY, MARCH 3, 1983

(All figures in text below are in seasonally adjusted current dollars.)

New orders for manufactured goods in January increased \$3.8 billion or 2.4 percent from December to \$160.1 billion, the Department of Commerce, Bureau of the Census reported today. This is the third consecutive monthly increase in this series. The January orders estimate is \$12.0 billion below the high recorded in July 1981 of \$172.1 billion.

Shipments of manufactured goods in January increased \$3.4 billion or 2.2 percent to \$156.2 billion. Shipments had been relatively unchanged in October through December at approximately \$152 billion. The backlog of orders held by manufacturers at the end of January showed an increase of \$3.9 billion or 1.3 percent to \$298.4 billion, following a 1.2 percent increase in December. Prior to that, the orders backlog had declined 16 consecutive months. The increase in the orders backlog the last 2 months was mainly caused by large defense orders. Without the defense category, the orders backlog in December declined 1.3 percent but in January showed a small increase of 0.2 percent.

The book value of manufacturers' inventories decreased in January \$2.6 billion or 1.0 percent to \$262.6 billion. Except for a small increase last February, inventories have been declining since November 1981 when they were valued \$23.1 billion higher at \$285.8 billion. The inventory to shipments ratio for January dropped to 1.68, down substantially from the December ratio of 1.74.

Within the durable goods sector, the January new orders of \$80.7 billion include \$8.6 billion in defense orders. Although defense orders for January were down 24 percent from December, the January orders level is second only to the record December estimate of \$11.3 billion. Without the defense decline, new orders for durable goods increased 10.5 percent in January.

Within the major industry categories, the January increase in orders was predominantly in noncapital goods items: steel orders were up \$1.0 billion or 40 percent to \$3.5 billion; non-

ferrous metal orders were up \$0.4 billion or 12 percent to \$4.0 billion; motor vehicle and parts orders were up \$1.7 billion or 20 percent to \$10.6 billion; and construction related industries, i.e., lumber, furniture, and stone, clay, and glass products were together up 14 percent. New orders for nondefense capital goods in January increased \$0.8 billion or 3.7 percent to \$20.9 billion. New orders for nondurable goods were down \$0.3 billion or 0.4 percent for the month to \$79.3 billion.

As with new orders, the January increase in manufacturers' shipments of 2.2 percent was attributable to the durable goods sector, where increases in noncapital goods categories were widespread. The motor vehicle and parts industry accounted for over half the increase, going up \$1.8 billion or 21 percent to \$10.4 billion. Within the capital goods categories, shipments of nondefense capital goods were down \$0.5 billion or 2.3 percent to \$21.4 billion; while shipments of defense capital goods were down \$0.1 billion or 1.1 percent to \$5.0 billion.

Although the value of the orders backlog increased in January 1.3 percent and in December 1.2 percent following 16 consecutive monthly declines, the patterns of change among the industries were mixed. For the capital goods sector, the backlog of orders for nondefense capital goods continued downward, declining \$0.5 billion or 0.4 percent to \$122.4 billion in January, while the defense backlog continued increasing, this month up \$3.5 billion or 3.9 percent to \$94.3 billion.

The decrease in the book value of manufacturers' inventories was concentrated in the durable goods sector where every major industry category except lumber showed declines. Within the nondurable goods sector, the value of inventories increased \$0.4 billion or 0.4 percent to \$88.6 billion, with the largest increase coming in the petroleum products industry, which was up \$0.5 billion or 5.1 percent to \$9.7 billion.

The advance report on durable goods for February is scheduled for release on March 22, 1983, and full report is scheduled for release on March 31, 1983.

Address inquiries concerning these figures to U.S. Department of Commerce, Bureau of the Census, Industry Division, Washington, D.C. 20233, or call Ruth Runyan or Kathleen Swindell-Menth, (301) 763-2502.

For sale by Customer Services (DUSD) Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price, \$1.50 per copy, \$18.00 per year.

^PPreliminary. ^TRevised.

(n) When new orders for a prior month are negative because of cancellations, the percentage change calculation is algebraically negative, even though there is a net dollar increase from the prior month to the current month. Using absolute values the percent increase in new orders for engines and turbines in January was 387.4 percent.

¹Shipments and new orders are the totals for the period and are adjusted for trading-day and calendar-month variations; unfilled orders and inventories are as of the end of the period and are not adjusted for trading-day or calendar-month variations.

²The supplementary series are regroupings of the separate industry categories: Household durable goods industries includes household furniture; kitchen articles and pottery; cutlery, handtools, and hardware; household appliances, radio and TV, ophthalmic goods, watches, and clocks; and miscellaneous personal goods.

Nondefense capital goods include machinery, except electrical (excluding farm machinery and equipment and machine shops); electrical machinery (excluding household appliances, radio and TV, and electronic components); railroad equipment; and the nondefense portions of ordnance; communication equipment; aircraft and aircraft parts; and shipbuilding, converting and repairing.

Defense capital goods include ordnance, communication equipment, aircraft and aircraft parts, and shipbuilding converting and repairing. The defense data are comparable to those published annually in the MA-175, "Shipments to Federal Government Agencies."

(X) Not Applicable

Note: The revisions are the differences between the month-to-month percent changes of the preliminary and final estimates. The monthly averages are the simple averages of the differences, without regard to sign, for the months specified. The advance to final percent change differences for the durable goods industries are shown in the advance report for the month.
